- Dual pane windows

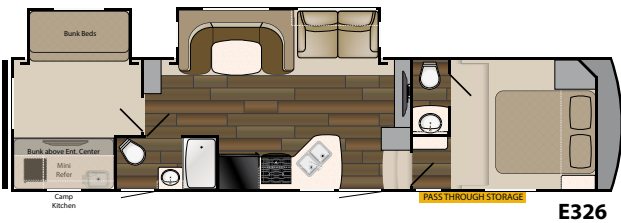

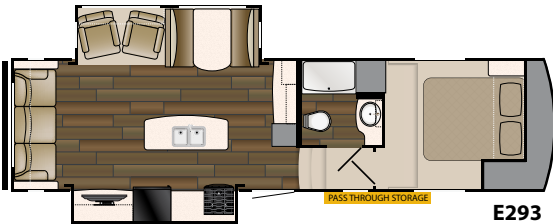

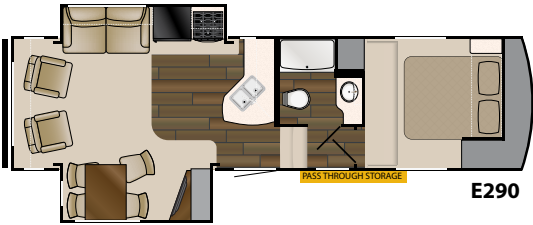

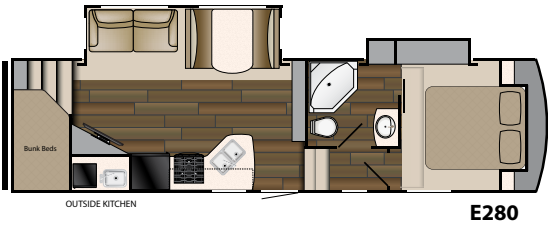

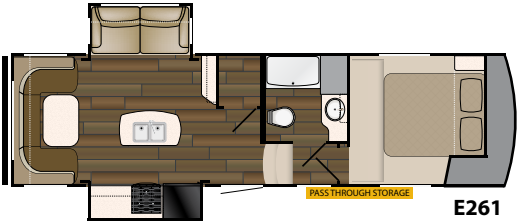

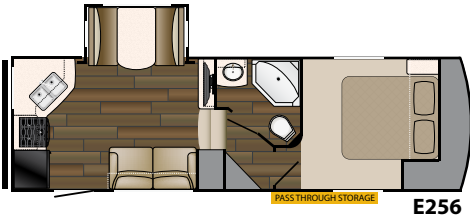

STRENGTH:

① Fiberglass that is laminated to a 2 1/8" luan board. We then laminate a second layer of 3 1/8" luan, which acts as a vapor barrier, ensures the walls are straight and smooth, and helps eliminate thermal transfer. The luan sheets are staggered during this process for added strength, durability and a smoother finish. ④ The double welded aluminum structure is then filled with block foam insulation and finished with 5 1/8" luan covered in a ⑥ decorative wall vinyl
